

Transferring your Australian superannuation to ASB KiwiSaver Scheme

ASB KiwiSaver Scheme Information Sheet for Australian Providers

The ASB KiwiSaver Scheme will accept transfers from all Australian complying superannuation funds.

Before you start the transfer process

To transfer your Australian superannuation savings to the ASB KiwiSaver Scheme you must be a member of the ASB KiwiSaver Scheme.

If you have not enrolled with us already, you will need to do this before you can apply for a transfer from your Australian provider (you will need to provide your Australian provider with your ASB KiwiSaver account number).

Before you do anything it's a good idea to get some financial and tax advice because different investment and insurance options, fees, currency exchange rates and tax might have an impact on your transfer.

Completing the transfer forms

Once you've completed the transfer forms for your Australian provider, send the below scheme details for the ASB KiwiSaver Scheme with those forms to your Australian provider, including your ASB KiwiSaver Scheme account number, so they can arrange the transfer of your funds.
