

ASB KiwiSaver Scheme Growth Fund

Fund Update for the quarter ending 31 March 2021
This fund update was first made publicly available on: 03 May 2021

What is the purpose of this update?

This document tells you how the Growth Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. ASB Group Investments Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

To provide high total returns allowing for large movements of value up and down. The number of years with negative returns are generally expected to be the highest of the funds in the ASB KiwiSaver Scheme. We manage asset allocation and currency hedging over the medium to long term relative to the target investment mix. We focus on cost effective management. The Growth Fund invests in income and growth assets with a target investment mix of 20% income assets and 80% growth assets.

Total value of the fund	\$4,047,744,265
Number of investors in the fund	154,634
The date the fund started	02/10/2007

What are the risks of investing?

Risk indicator for Growth Fund

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at <http://www.sorted.org.nz/tools/investor-kickstarter>

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

The risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for a 5 year period to 31 March 2021. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

The risk indicator may not be a reliable indicator of the risk or returns that a fund is likely to experience in the future. For example, the risk indicator may be different if it was based on returns over a longer period.

How has the fund performed?

	Average over past five years	Past year
Annual return (after deductions for charges and tax)	8.97%	26.84%
Annual return (after deductions for charges but before tax)	10.05%	29.13%
Market index annual return (reflects no deduction for charges and tax)	10.80%	29.23%

The market index return is the target investment mix asset allocation weighted sum of the asset class market index return, where the target investment mix and asset class market indices are each as described in the Statement of Investment Policy and Objectives (SIPO). Additional information about the market index is available on the offer register at disclose-register.companiesoffice.govt.nz (search for ASB KiwiSaver Scheme).

Annual return graph

This shows the return after fund charges and tax for each of the last 10 years ending 31 March. The last bar shows the average annual return for the last 10 years, up to 31 March 2021.

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Growth Fund are charged fund charges. In the year to 31 March 2020 these were:

	% of net asset value
Total fund charges¹	0.70%
Which are made up of:	
Total management and administration charges	0.70%
Including:	
Manager's basic fee	0.70%
Other management and administration charges	0.00%
Total performance-based fees	0.00%
Other charges	Dollar amount per investor
Membership fees	\$30.00

¹Currently no GST or other tax is payable on the fees.

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). These fees are not currently charged for the fund.

Small differences in fees and charges can have a big impact on your investment over the long term.

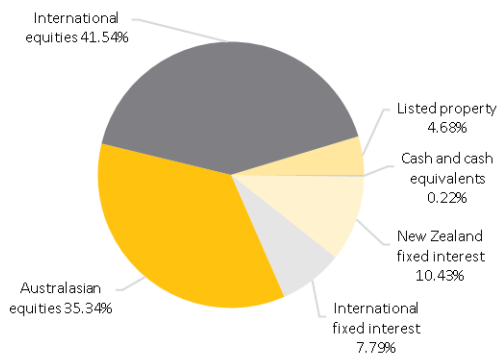

Example of how this applies to an investor

Jason had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Jason received a return after fund charges were deducted of \$2,684.00 (that is 26.84% of his initial \$10,000). Jason also paid \$30.00 in other charges. This gives Jason a total return after tax of \$2,654.00 for the year.

What does the fund invest in?

Actual investment mix

This shows the types of assets that the fund invests in.

Target investment mix

This shows the mix of assets that the fund generally intends to invest in.

Cash and cash equivalents	1.00%
New Zealand fixed interest	6.50%
International fixed interest	12.50%
Australasian equities	40.00%
International equities	32.50%
Listed property	7.50%
Unlisted property	0.00%
Commodities	0.00%
