## Positive Impact Fund

Fund Update for the quarter ending 31 March 2021

This fund update was first made publicly available on: 03 May 2021

### What is the purpose of this update?

This document tells you how the Positive Impact Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. ASB Group Investments Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

### Description of this fund

To provide moderate to high returns allowing for large movements of value up and down, from an exposure to a portfolio of investments with a preference for those that make a positive impact on society or the environment. The number of years with negative returns are generally expected to be similar to the Growth Fund in the ASB KiwiSaver Scheme. The Positive Impact Fund invests in income and growth assets with a target investment mix of 40% income assets and 60% growth assets.

Total value of the fund	\$69,505,298
Number of investors in the fund	2,767
The date the fund started	25/07/2019

### What are the risks of investing?

#### Risk indicator for Positive Impact Fund<sup>1</sup>

<sup>1</sup>As the fund has not been in existence for five full years its risk indicator has been calculated using market index returns as well as actual returns. As a result, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund. Market index returns have been used for the period from 1 April 2016 to 24 July 2019.

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at <http://www.sorted.org.nz/tools/investor-kickstarter>

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

The risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for a 5 year period to 31 March 2021. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

The risk indicator may not be a reliable indicator of the risk or returns that a fund is likely to experience in the future. For example, the risk indicator may be different if it was based on returns over a longer period.

### How has the fund performed?

	Past year
<b>Annual return</b> (after deductions for charges and tax)	24.87%
<b>Annual return</b> (after deductions for charges but before tax)	25.77%
<b>Market index annual return</b> (reflects no deduction for charges and tax)	28.02%

The market index return is the target investment mix asset allocation weighted sum of the asset class market index return, where the target investment mix and asset class market indices are each as described in the Statement of Investment Policy and Objectives (SIPO). Additional information about the market index is available on the offer register at [disclose-register.companiesoffice.govt.nz](http://disclose-register.companiesoffice.govt.nz) (search for ASB KiwiSaver Scheme).

### Annual return graph

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 31 March 2021.

**Important:** This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

## What fees are investors charged?

Investors in the Positive Impact Fund are charged fund charges. Estimates of these are\*:

	% of net asset value
<b>Total fund charges<sup>2</sup></b>	1.00%
Which are made up of:	
<b>Total management and administration charges</b>	1.00%
Including:	
Manager's basic fee	1.00%
Other management and administration charges	0.00%
<b>Total performance-based fees</b>	0.00%
<b>Other charges</b>	<b>Dollar amount per investor</b>
Membership fees	\$30.00

<sup>2</sup>Currently no GST or other tax is payable on the fees.

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). These fees are not currently charged for the fund.

Small differences in fees and charges can have a big impact on your investment over the long term.

### Example of how this applies to an investor

Jason had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Jason received a return after fund charges were deducted of \$2,487.00 (that is 24.87% of his initial \$10,000). Jason also paid \$30.00 in other charges. This gives Jason a total return after tax of \$2,457.00 for the year.
